

Forest Statistics CD 2018

The State Forest Service, using the information registered in the State Forest Register of the State Forest Information System, prepares annually information on the inventory of forests in the country and the forestry activities carried out in the previous calendar year.

The following information was prepared:

Form/Table 01 - Distribution of forest land areas by land categories

Information on forest land area breakdown by categories.

Form/Table 02 - Forest structure age

Forest stand areas and age structure by decades, calculated by dominant tree species and their age by administrative territories and types of property - public, private, municipal.

The information is prepared by compiling data on areas where the main felling is prohibited, the main and foreclosure forbidden, clearcutting is prohibited, economic activity is prohibited, without restrictions and together.

Form/Table 03 - Renewable areas

Renewable areas consist of clearings and forest stands with a basal value below the critical limit.

The information has been prepared by region, parish, type of property, renewal periods, forest types, age of clearing.

Form/Table 04 - Forest division into forest types

Areas of forest stands and stockpiles by dominant tree species and forest types, by counties and types of forest property.

Form/Table 05 - Areas with economic activity restrictions

Distribution of forest lands and forest areas by economic activity restrictions by type of forest property.

Form/Table 06 - Tree felling in ____ year

Tree felling volumes (areas and liquid stock) by dominant tree species and types of felling.

Form/Table 07 - Forest regeneration in _____ year.

Breakdown of renovated areas by dominant tree species, types of restoration and forest types.

Form/Table 08 - Forestation (including plantation forest) _____ year.

Areas planted by counties, parishes, tree species, forest types.

Form/Table 09 - Care of youngsters _____ year

Areas of well-developed young stands divided by dominant tree species, counties and parishes.

Form/Table 11 - Protected areas

Distribution of forest and forest land areas by protected areas.

Form/Table 13 - Age structure of restored clearings in year

Breakdown of renovated areas by age of agglomeration and forest types.
